

Instructions for Patented Therma Top™ Tables

Congratulations on making this fine investment! This table includes a patented special built-in heated surface which enables you to warm your table to a temperature that you choose as comfortable, soothing, and enjoyable.

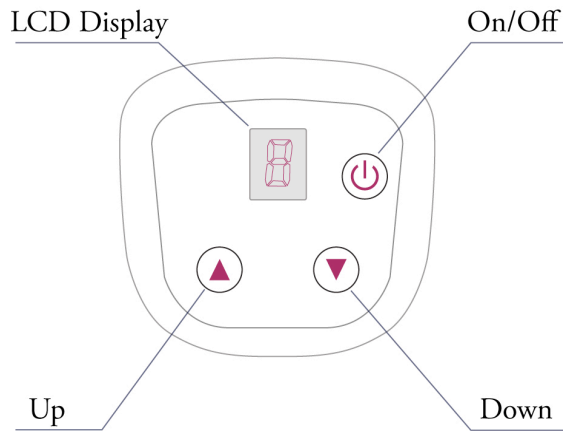

Usage Guide

Start

To turn on, press the red On/Off button located at the top right on the controller. The controller will automatically display “L” indicating that the lowest heat level

Temperature Set

On the controller there are 2 arrow buttons which control the heat levels. There are 10 (L * 2 * 3 * 4 * 5 * 6 * 7 * 8 * 9 * H) adjustable warming settings. Pressing the Red Up arrow button increases the level of heat, and the Blue Down arrow button decreases the level of heat. You can experiment until you find the heat level that you find most comfortable.

Automatic Shut Off

This Therma Top™ system is equipped with an automatic safety shut off. The controller will automatically turn off after 4 hours. Just turn on the Therma Top™ built in heating system and enjoy 4 hours of undisturbed heat.

Important Note: If the LCD displays an “F”: Check all connections that they are securely fastened. Unplug controller from outlet and wait at least 20 seconds before plugging back into outlet.

Information: The table may not feel hot to the touch. The level of heat was designed to feel warm while laying or sitting on the table.
